UML CLASS DIAGRAM — OOP INTERFACE PROTOTYPE
PrototypeUI
- directory: DoctorDirectory
- service: AppointmentService
+ renderDoctors(): void
+ handleBooking(): void
+ renderAppointments(): void
uses
calls
AppointmentService
- directory: DoctorDirectory
- repository: LocalStorageRepository
+ book(input): Appointment
+ list(): Appointment[]
+ cancel(id): boolean
uses
persists through
DoctorDirectory
- doctors: Doctor[]
+ search(query): Doctor[]
+ findById(id): Doctor
LocalStorageRepository
- storageKey: string
+ getAll(): object[]
+ saveAll(items): void
+ add(item): void
contains 0..*
stores serialised
Doctor
- id: string
- hospital: string
- name: string
- department: string
- speciality: string
+ matches(query): boolean
+ toCardData(): object
Appointment
- id: string
- doctorId: string
- patient: Patient
- date: string
- serial: number
- status: string
+ toJSON(): object
refers to
1 patient
Patient
- name: string
- phone: string
- registrationNo: string
+ validate(): string[]
